

CIAA AI seminar

sponsored by Deloitte and SAS

**Thursday December 7, 2017 Breakfast @ 8:00 am; Seminar 9:00 am - 12:00 pm
The Ritz-Carlton, 181 Wellington St. West, Wellington Ballroom, Toronto**

Join us for an engaging morning of learning about the cutting-edge innovations in the AI industry. We'll discuss Artificial Intelligence, Quantum Computing, Machine Learning, Robotic Process Automation, Financial Intelligence, Predictive Analytics and more. You'll explore the opportunity for AI in Insurance and the finance function from experts in the field.

Haipeng Xie, Ph. D, Chief Technology Officer, Partner, Dr Robot Inc.

Dr. Xie obtained his PhD in robotics from Western University in 2000. He founded Dr Robot Inc. – a robotic technology development – to develop high-functioning intelligent robots that were cost-effective and available to consumers. Dr. Xie worked for five years as a robotics contractor for Canadian Space Agency, developing the dual-arm manipulator control system for the latest space arms on International Space Station.

Melanie Travers, Manager, Deloitte LLP

Melanie is with Deloitte's Finance Consulting practice and brings over 16 years of financial management and consulting experience. Her area of expertise lies in service delivery model design, including shared services, business process optimization, and robotics and cognitive automation (R&CA). Melanie also leads the R&CA service line nationally for Deloitte's Finance Consulting practice.

Camilo Lievano, Director, Cognitive & Artificial Intelligence, Deloitte

Camilo is responsible for designing and delivering Cognitive & AI solutions for leading organizations across Canada and North America. He is also deeply involved in industry and academic initiatives that are developing and promoting AI technologies and is a frequent speaker at industry and learning events.

Steve Holder, Strategy Executive, Analytic Ecosystems, SAS Canada

Steve is responsible for driving the SAS solution strategy for Canadian customers by providing thought leadership for the SAS Analytics, Big Data and Cloud portfolios, including Open Source integration. Steve has seen first-hand how the use of analytics and data can help customers solve business problems; make the best decisions possible and unearth new opportunities.
